ASEE

Inspiring Innovation
Advancing Research
Enhancing Education

Energize Your Career with ASEE

Networking Opportunities

A core benefit of ASEE membership is the ability to interact, engage, and connect with other members who share the same academic and professional interests as you do. Participate in one of ASEE's geographic sections for convenient professional development and networking opportunities.

Divisions

There are over 50 professional interest groups to choose from. These Divisions are the pulse of ASEE and provide members with professional development and networking opportunities within their technical specialty or particular academic area of interest. You are sure to find one or more that suit your individual needs.

ASEE Annual Conference and Exposition

Members receive substantial savings to attend ASEE's National Conference. It is the only conference dedicated to all disciplines of engineering education. It is committed to fostering the exchange of ideas and information, enhancing teaching methods and curricula, and providing prime networking opportunities.

About ASEE

ASEE is a nonprofit organization composed of individuals and institutions committed to furthering education in engineering and engineering technology, and to improving society's awareness and understanding of technology. Linking academia, industry, and government, ASEE is a worldwide leader in promoting excellence in instruction, research, public service, and practice.

ASEE is the only organization dedicated to the professional needs of engineering educators. It develops policies and programs to enhance professional opportunities for engineering faculty members, along with activities aimed at increasing enrollment in engineering and engineering technology colleges.

Why Join ASEE?

ASEE connects you to a world of research and a wealth of information right at your fingertips. Our publications, conferences, professional development workshops and online tools provide access to the best practices and important trends in engineering education, including the latest instructional methods and innovative curricula. Members can also keep up to date on opportunities for fellowships and government and industry research programs, and share their scholarly research in peer-reviewed conference proceedings.

ASEE is also a leader in promoting K-12 engineering education nationwide through widely circulated publications, outreach programs, and K-12 workshops for students and teachers.

ASEE Benefits:

- Prism Magazine
- The Journal of Engineering Education
- Advances in Engineering Education Applications (Online Journal)
- Daily & Monthly E-Newsletters
- Local Workshops
- Conferences and Proceedings
- Networking Opportunities
- Online Resources
- Member-Only Discounts
- And so much more...

With technology so omnipresent, creating dynamic teaching methods is critical to training the millennial engineer. ASEE provides a network of educators and facilitates conversation in a community dedicated to sharing innovative ideas in engineering pedagogy.
